## **Abstract**

Short introduction to subject of the paper ...

# 1 Introduction

Make it possible for all to write documents with L<sup>A</sup>T<sub>E</sub>X!

## 1.1 more introduction

Go more in detail ...

### 1.1.1 even more introduction

come to the point ...

**Paragraphs** A paragraph is small but

**Subparagraphs** subparagraphs are smaller!

**Outline** First we start with a little example of the article class, which is an important documentclass. But there would be other documentclasses like book 2, report 2 and letter 2 which are described in Section 2. Finally, Section 6 gives the conclusions.

# 2 Documentclasses

- article
- book
- report
- letter

1. article
2. book
3. report
4. letter

**article** Article is ...

**book** The book class ...

**report** Report gives you ...

**letter** If you want to write a letter.

### 3 tabular

No paper without a tabular!

first column	second column	third column	fourth column
l stand for left	c for center	r for right	and p for predefined size

### 4 figure and caption

Figure 1: A None image from the graphics test suite

### 5 some math

Math in text is called in line math just put \$ character around the math think. Like  $a^2 + b^2 = c^2$ . It looks better if you use this

$$a^2 + b^2 = c^2$$

### 6 Conclusions

There is no longer  $\text{\LaTeX}$  example which was written by [Doe].
